The MARE Publication 23, titled 'Status Resilience and Governance', explores the concept of status resilience and its importance in understanding governance.

Status resilience refers to the ability of individuals and groups to maintain their social status in the face of adversity. It is an important factor in understanding governance because it can affect how people interact with each other and with institutions.

Key Findings

The MARE Publication 23 identifies several key findings about status resilience and governance:

- Status resilience is an important factor in understanding governance.

- Individuals and groups with high status resilience are more likely to participate in governance and have a say in decision-making.
- Institutions that promote status resilience can help to create more inclusive and effective governance systems.

Recommendations

The MARE Publication 23 provides several recommendations for policymakers and practitioners on how to promote status resilience and improve governance:

- **Invest in education and skills development.** Education and skills development can help individuals and groups to improve their status and build resilience.
- **Promote social inclusion.** Social inclusion can help to reduce stigma and discrimination and create a more level playing field for everyone.
- **Strengthen institutions that promote status resilience.** Institutions such as schools, hospitals, and community centers can help to provide individuals and groups with the support they need to maintain their status.
- **Develop policies that address the root causes of status inequality.** Policies that address poverty, discrimination, and other forms of inequality can help to create a more just and equitable society.

The MARE Publication 23 provides a valuable overview of the concept of status resilience and its importance in understanding governance. The publication's findings and recommendations can help policymakers and practitioners to develop more inclusive and effective governance systems.
