## History

Stedman's was first published in 1966 by Thomas Lathrop Stedman. Stedman was a physician and medical lexicographer. He compiled the dictionary from his own research and from the work of other medical professionals. The first edition of Stedman's contained over 20,000 entries. The dictionary has been updated and expanded over the years, and the current edition contains over 100,000 entries.

## Structure

Stedman's is organized into three sections: abbreviations, acronyms, and symbols. The abbreviations section includes entries for all types of abbreviations, including medical abbreviations, drug abbreviations, and laboratory abbreviations. The acronyms section includes entries for all types of acronyms, including medical acronyms, drug acronyms, and laboratory acronyms. The symbols section includes entries for all types of symbols, including medical symbols, drug symbols, and laboratory symbols.
